

My 8% Glycolic Acid Routine

Personal routine for gradual introduction and safe use before expiry (10/2026).

Important: This is a leave-on exfoliating product for most areas. Start slowly. Stop using it if you experience persistent burning, swelling, severe itching, or irritation.

How to Use Each Area

Face (Tuesday & Friday nights)

Cleanse → dry completely → apply a thin layer (about 3–4 drops) → moisturize. Leave overnight. Avoid eyes, lips, and broken skin.

Neck / darker neck areas

Clean → dry → apply a thin layer → moisturize. Start twice weekly. Use sunscreen on exposed neck skin during the day.

Underarms

Apply only on clean, completely dry skin. Use a thin layer. Do not use immediately after shaving/waxing or on irritated skin. Start twice weekly.

Knees & elbows

After bathing or cleansing: dry skin → apply to darker/rough areas → moisturize. Start three times weekly.

Scalp

Before hair wash: apply carefully to dry scalp, mainly where there is buildup. Leave about 10 minutes, then shampoo. Start once weekly.

Weekly Schedule

Day	Face	Neck	Underarms	Knees/Elbows	Scalp
Monday	—	—	—	Yes	—
Tuesday	Yes	—	—	—	—
Wednesday	—	Yes	—	Yes	—
Thursday	—	—	Yes	—	—
Friday	Yes	—	—	Yes	—
Saturday	—	Yes	—	—	—
Sunday	—	—	Yes	—	Yes (before shampoo)

After Applying

For face, neck, underarms, knees and elbows: do not wash the glycolic acid off immediately. Leave it on and wash normally the next day. For scalp: wash it off after about 10 minutes and shampoo.

Rules to Remember

- Introduce slowly for the first 2 weeks.
- Do not apply repeatedly to the same area on the same day.

- Avoid scrubs and other strong exfoliating acids on glycolic-acid nights.
- Do not apply to cuts, wounds, or severely irritated skin.
- Use sunscreen during the day, especially on face and neck.
- Your Vitamin C serum can be introduced later, after your skin is comfortable with this routine.
- Do not force yourself to use excessive amounts just to finish the bottle—use it safely.
